# THE POWER BEHIND YOUR ORGANISATION'S FUTURE

# SUPPORTING THE NEEDS OF TODAY'S OFFICE AND TOMORROW'S

Today's organisations benefit from ever-more sophisticated document processes. Gone are the days when the printed document reigned supreme. While printing and copying remain the bedrock on which document processes are built, modern businesses need to be able to handle a massive range of incoming and outgoing digital documents.

The TASKalfa 3500i, 4500i and 5500i are perfectly equipped to support such modern offices. As well as having ample ability to produce monochrome documents rapidly and reliably day after day, their abundant digital capabilities will make them the hub of your business communications.

Offices with relatively straight-forward document processes will benefit from the TASKalfas' ability to send scanned documents to email recipients, network servers and even USB sticks in a variety of common digital formats.

Offices with more advanced processes may use bespoke document management applications; the TASKalfas' flexible development platform lends them an unprecedented level of compatibility with such systems.

The extraordinary intelligence built into the TASKalfa 3500i, 4500i and 5500i delivers tangible benefits to your staff whether they are performing basic or advanced tasks. The superb touch-screen control panels can be customised to suit different users and applications, making their working day easier and improving their productivity.

The job skip function, for example, stops backlogs developing: if there is no A3 paper available to print a booklet other jobs will jump the queue ahead of it, keeping the multifunctional working productively.

It's about making multifunctionals work for you rather than you working around multifunctionals.

### PRODUCT HIGHLIGHTS TO MEET YOUR REQUIREMENTS:

- ▶ Up to 55 A4 pages per minute
- ► 1GB RAM & 160GB hard disk memory
- Network printing (PCL and PostScript-compatible) and colour scanning as standard
- ► 1.150-sheet paper capacity as standard, expandable to 7.150 sheets
- Single-pass or reversing double-sided document processors\*
- Wide range of media support: 300gsm, over-sized A3 and 1.2m banners
- Flexible paper handling (up to 6 media sources)
- ► Expandable fax functions\* dual-line fax, network fax and Internet fax
- Productive finishing options including booklet printing and tri-folding
- Security-ready\*: Data Security Kit, Copy Guard Kit and support for ID card authentication
- Long-life components provide unprecedented efficiency and reliability

### THE PRODUCTIVITY BOOST YOU SEEK

Whether in the public or private sector, every organisation faces pressure to improve productivity without increasing costs or staff numbers. The TASKalfa 3500i, 4500i and 5500i can help.

- Demanding incoming document processes can be handled by a single TASKalfa 3500i, 4500i or 5500i thanks to their 80ipm double-sided colour scanner, their ability to format scanned documents into formats such as PDF, JPG and XPS, and their compatibility with a wide range of document management systems.
- High-volume print runs are processed rapidly, immaculately and without user intervention thanks to the unrivalled reliability of the TASKalfas' long-life technology and high-capacity paper decks.
- High-volume print runs are processed rapidly, immaculately and without user intervention thanks to the unrivalled reliability of the TASKalfas' long-life technology and high-capacity paper decks.

- Fax functions\* can be streamlined and their costs reduced through the TASKalfas' incorporation of dual-line fax to send and receive at the same time, network fax to take documents directly from network PCs and Internet fax to dramatically reduce broadcast costs.
- Users can move from machine to machine, confident that the similarity of all TASKalfa touchscreen control panels will present no obstacles.
- Document costs can be allocated accurately according to a department's actual print and copy volume thanks to the TASKalfa 3500i, 4500i and 5500i's compatibility with fleet management and auditing systems.
- Document confidentiality can be preserved economically, simply and reliably thanks to their compatibility with industry-standard applications such as Equitrac, Safecom and Papercut.

## THE SIMPLER ROUTE TO A PRODUCTIVE FUTURE

A productive office depends on being able to deliver usable technology to your staff; capabilities alone are not sufficient.

All tasks, whether basic or advanced, are easy to perform on the TASKalfa 3500i, 4500i and 5500i thanks to the command system used on its superb 10.1" colour touch-screen control panel. The menu structure leads users through advanced tasks in a step-by-step fashion. Custom buttons can condense multi-stage operations into a single keystroke, sending, for example, documents to specific email addresses and network locations in a particular format (e.g. PDF, JPG, TIF or XPS).

The TASKalfas can also boost office productivity by enhancing the performance of your IT infrastructure. They incorporate a 160GB hard disk which can store standard forms and frequently-used documents. Once stored, they

are not just more accessible to your staff, they can also be printed repeatedly with none of the network degradation that would normally accompany a long print run.

Performance is a concept that underpins productivity. In this respect, the TASKalfa 3500i, 4500i and 5500i are built on solid foundations. The print speed of up to 55ppm hides other factors that contribute even more to the efficiency of your office. The paper paths used by the multifunctionals and their finishers have been improved to maintain high-speeds during double-sided printing and booklet creation. The processor architecture has been boosted to ensure full-speed printing for all but the most exceptional documents. And the single-pass, double-sided scanner\* can scan 175 full-colour sheets, unattended, at 80ipm.

\* optional

## IS YOUR BUSINESS JUST A LITTLE BIT DIFFERENT?

### HyPAS<sup>\*</sup>

KYOCERA's open software development platform,

allows you to integrate your multifunctionals into your existing business practices in exactly the way you need. Through the combination of Java and Web Services technologies, HyPAS™ is able to communicate with a broad range of line-of-business applications such as DMS or ERP. HyPAS™ places these applications right on the multifunctional's control panel, making them as much a part of its operation as copying and scanning.

## DOES YOUR MULTIFUNCTIONAL PROTECT YOUR CONFIDENTIALITY?

The ability to share information is powerful and beneficial but there are legitimate business reasons for restricting access to sensitive documents. The TASKalfa multifunctionals support IPsec, IPv6 and PDF encryption as standard. They can be incorporated into your business' existing network authentication process for simple and effective user management.

User access to the TASKalfas can be streamlined further using optional Card Authentication systems, bypassing lengthy logon procedures without compromising security. Kyocera's optional Data Security Kit securely deletes data from the TASKalfa's hard disk. And the optional Document Guard Kit prevents controlled documents being copied without authority.

Used collectively, these features protect sensitive data and documents from unauthorised access.

## BUILT FOR THE PERFECT FINISH

## THE FLEXIBILITY TO SUIT YOUR CUSTOMERS AND YOUR STAFF

The effectiveness of your documentation depends on your ability to deliver impressive materials in a short space of time. The new TASKalfa multifunctionals have the finishing flexibility to produce documents the way

your business partners prefer them: stapled, holepunched, stapled booklets or tri-folded letters – the choice is yours.

To boost staff productivity, the TASKalfa 3500i, 4500i and 5500i also support a 7-bin mailbox sorter to separate one user's output from another plus high-capacity feeders to print up to 7,150 pages without interruption.

#### **Base version**

Two 500-sheet cassettes and a 150-sheet multi-purpose tray provide a generous paper reserve. The optional DP-770 document processor automatically reverses paper for double-sided scanning and copying.

#### **Extended base functionality**

An additional paper cabinet with coasters protects your paper and is convenient when paper storage rooms are far away.

#### Extra paper storage

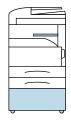

Two additional PF-730 500-sheet paper cassettes (60–256 gsm, 305 x 457mm) enable fast, convenient access to multiple paper types.

#### **Basic finishing**

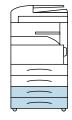

For professional document finishing add the DF-770 1,000-sheet finisher and PF-7C option that staple and punch documents (attachment kit AK-730 required). The JS-731 70-sheet job separator keeps your output well organized.

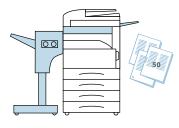

Basic configuration with DP-770

CB-730/731, JS-730

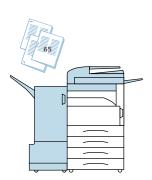

PF-730

JS-731, AK-730, DF-770, PH-7C

#### High-volume document finishing

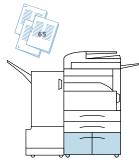

The DP-771 high-capacity document processor scans double-sided documents quickly in one pass. The DF-790 4,000-sheet finisher supports high-volume output.

DP-771, AK-730, DF-790, JS-731

#### High-capacity paper feeding

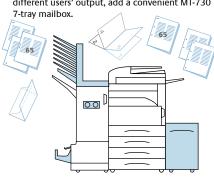

For large-volume printing, the PF-740 paper feeder can supply paper from two 1,500-sheet cassettes.

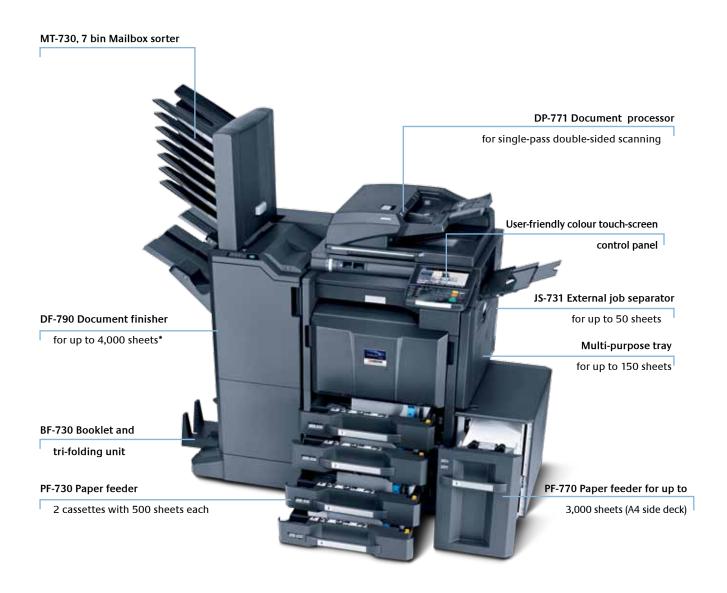

PF-740

#### **Advanced finishing**

The DF-790 finisher with the BF-730 and PH-7C options adds\* 3,000-sheet storage and stapling, booklet-printing, hole-punching and tri-folding functions to the base machine. To separate different users' output, add a convenient MT-730

AK-730, DF790, MT-730, BF-730, PH-7C, PF-770

## WANT HIGH-QUALITY DOCUMENT OUTPUT FROM A RELIABLE AND PRODUCTIVE DEVICE?

If you need high-quality, flexible and professional document management, you really need to consider KYOCERA. As one of the world's leading manufacturers of office document solutions, KYOCERA is committed to consistently high-quality products and services. You can not only expect the most reliable hardware and software, you can also expect exceptional service, comprehensive consulting and tailor-made financing. Whatever your needs, you can count on us. Want to know more? Simply get in touch with your local KYOCERA Business Partner.
