A4 MONOCHROME MULTIFUNCTIONALS

ECOSYS ECOSYS stands for ECOlogy, ECOnomy and SYStem printing. With their long-life components, ECOSYS devices are designed to maximise durability and minimise the total cost of ownership by reducing maintenance, administration and consumables spending. The cartridge-free system means that only the toner has to be replaced regularly. The modular design concept allows you to add workflow-enhancing functions as required. Integrated system software provides long-term cross-network compatibility. KYOCERA's long-life components cost you and the environment less.

PRESCRIBE IIe
With PRESCRIBE IIe, Kyocera's page design and control language, complex graphics, logos and multipart forms can be created independently on a computer and stored in the printer. They can be recalled from the printer's memory as needed, reducing network congestion.

The KM NetViewer
KMNet Viewer enables complete monitoring and control of all ECOSYS printers and digital KYOCERA multifunctionals from any Windows© PC and thus provides ideal network administration. It also supports other devices using the SNMP protocol.

Status Monitor and Command Center
Status Monitor shows a printer's current condition and gives direct access to the web-based Command Center for modifying configuration settings (e.g. network settings, sleep mode and blocking access to the control panel).

USB Host Interface for printing from USB Flash Memory Sticks
PDF files can be printed directly from USB Flash Memory (e.g. a USB stick) via the USB host interface. Documents are selected directly via the printer's control panel. No computer is required.
