Panaboard

create, save and share ... in colour

Colour Scanning Capability

Panaboard Anything you write on the whiteboard with colour markers can be scanned in colour, allowing you to capture and distribute an accurate colour representation of your meeting notes. The scanned data can be saved in colour, industry-standard PDF or JPEG file formats. A time stamp function allows you to insert the current date and time in the upper right corner of your saved images, facilitating easier organisation and filing.

SD Memory Card & USB Flash Memory

A built-in SD Memory Card slot and USB Flash Memory port allow you to store your data directly on a removable SD Memory Card or USB Flash Memory device and transfer it to a PC.
